

# IOP – Set to seize the opportunity

December 2021

**Smallcaps offers a larger opportunity for Alpha generation**

# Smallcaps offer a larger opportunity for Alpha generation

- Wide dispersion of returns in both mid as well as small caps provides scope for bottom-up stock picking
- It is observed that the most Multibaggers were seen in the Midcap and Small cap space rather than Large caps due to dispersion

Returns range of Top 500 Companies by Market Cap (as on 31 <sup>st</sup> March 2020)			
Absolute Returns Range	Top 100	101 - 250	251 - 500
> 10x	1	8	8
5x- 10x	8	17	13
3x- 5x	15	22	21
2x- 3x	18	28	32
2x	11	20	34
Between 0 and 50%	18	16	45
Between 0 and -20%	13	9	19
Between -20% and -50%	11	19	42
Less than -50%	5	11	36

- Small Cap Index space on a whole is extremely dispersed with 108 stocks returns >100% and 36 stocks are <-50% and return distribution is across all the categories
- High dispersed portfolio returns are dominated by particular stock/sector
- Simple being present or absent in a few names - out of the highly dispersed stocks results in significant outperformance/underperformance of the portfolio

## Observations

- Similar to the Sensex, this small cap space finds the probability of loss being zero for 10 year time horizon
- But unlike Sensex, short term investment in Small cap space is riskier, thus Probability of loss for 1 year is 29% with min return being (71%)
- Based on the historical data, even this space, is beneficial with long term investing

# Why now? - Expect smallcaps to bounce back with economic recovery

Large caps and mid caps have been outperforming smallcaps for 2 years now ...

Small caps have never seen two consecutive years of negative return before 2018

## Why Now? - Ample Room for Growth: Nifty Smallcap 100/Nifty 50 still attractive

- This ratio is a good indicator for investing in smallcaps
- It peaks out at ~0.9. Current level suggests room for growth

**Given such divergence in Small cap Index, IOP portfolio still available at a historically low PEG of 0.9x**

# Low PEG : WCS23 'Valuation Insights' - Evidence Suggests It's the Best Time to Buy

PEG is short for P/E to Growth ratio : TTM P/E divided by 3 yrs forward earnings growth

PEG- What Works & What Doesn't		
PEG	Average 3Yr Alpha	Instances from 1998-2015
0-1	19%	33%
3+	-10%	11%
< 0*	-19%	34%

\* A PEG lesser than zero implies PAT de-growth in the next 3 years

In the 23<sup>rd</sup> Annual Wealth Creation Study, we used the PEG Ratio with 3-years' forward earnings to study return outcomes.

The findings revealed that

- **Buying stocks at PEG around 1x is supremely profitable**

## Low PEG : WCS23 ‘Valuation Insights’ - Evidence Suggests It’s the Best Time to Buy

Period 2013-18					
	1 yr	2 yr	3 yr	4 yr	5 yr
Sensex Return	19%	22%	10%	12%	12%
PEG < 1x Return	36%	61%	38%	45%	39%
<b>Alpha</b>	<b>17%</b>	<b>39%</b>	<b>28%</b>	<b>33%</b>	<b>27%</b>

- **Efficacy of PEG ratio is remarkable irrespective of the number of years of growth insight that investors may have.**
- Thus, PEG of less than 1x works for growth forecasts of 1, 2, 3, 4 or 5 years!
- **PEG of 1x delivered handsome alpha in 14 out of 15 observations (barring GFC led fall in 08)**

## KAJARIA CERAMICS

Strong brand and distribution, market share gains and Real Estate revival to benefit

### Global Export Opportunity being serviced by Morbi

- Massive global export opportunity in tiles as countries look to restrict sourcing from China.
- A large chunk of supplies from Morbi to get diverted for exports that are growing at 50%yoy.

### Domestic real estate market is at the bottom

- We expect Kajaria to benefit from the boom in real estate cycle which is currently at the bottom of the cycle

### Market Share Gains

- Kajaria is the best ceramics play and is constantly gaining share from other private players
- Net cash balance sheet and superior brand, will help capitalise on market share gain

## ICICI SECURITIES Ltd.

Strong growth in demat accounts, non brokerage income bring diversification

### Industry tailwinds

Strong post-Covid ADTO trend has extended in the 2QFY21 too. Over 3m demat accounts were opened in the past four months.

### Impact of regulations

No impact on ISEC due to the new margin norms or share pledging norms that came into effect on 1st Sep'20

### MTF and ESOP funding book to grow

Will grow the MTF and ESOP funding book from current levels of INR15b. Received shareholder approval for up to INR35b on the loan book currently, but this cap could be increased in the future.

### Revenue diversification

Targeting to grow non-brokerage revenue from 40-42% to 50% of total revenue in a year or so

**CENTRAL DEPOSITORY SERVICES (INDIA) LIMITED**

Capital markets intermediary in a duopoly play

**Strong Macro variables to support the Growth**

Improving macro variables (demographics, per capita income), push towards financial inclusion, and shift in savings towards financial assets bodes well for capital market intermediaries

**Duopoly market with significant market share**

The asset-light model, duopoly play on the secular increase in stockholder accounts coupled with potential market share gains is a major positive for this thinly covered stock

**Well poised for growth as a proxy play**

As a proxy play on Indian capital markets, CDSL has several new revenue opportunities like (a) dematerialisation of unlisted public companies (d) transaction charges from new pledge/unpledged rules (c) commodity repository (d) Insurance repository business aids CDSL's topline growth

**Company to demand higher multiples**

Empirical studies suggest that limited-entry sectors tend to trade at higher multiples as investors gauge greater confidence in revenue/earnings, and more importantly, multiples tend to expand when new entities are listed

## MAX FINANCIALS

Best in class metrics, Axis Bank as largest shareholder, secular runway & collapse of hold-co structure

### Strong underlying insurance business

- With best in class metrics (20%+ VNB Margins, 20% RoEVs) and growth track record (20%+ EV compounding).

### Axis Bank overhang on verge of resolution

- Axis Bank emerging as the single largest shareholder with 18% stake. The firm recently received regulatory approvals.

### Holdco structure to collapse

- Expect Max Life shares to be listed in the next 12-18 months.

### Attractively valued

- Max is at 15x EVOP v/s 35x for HDFC Life, despite business metrics and growth being quite similar.

## GLAND PHARMA

A focused injectable player in a large end market with a strong track record

### Unique Business Model

- 100% focus on injectable across different formats,
- High backward integration,
- No Front end and own pipeline of molecules
- A win win for both partners and suppliers. High Longevity

### Favourable Economics

- Injectables forms 40% share of the global Pharma market of ~USD 1tn,
- Demand is growing at 10% annually in USD terms globally and 13% annually in the US itself
- Supply is unable to match the pace of demand

### Exemplary Financial and Operational Excellence

- Zero US FDA notifications across its facilities over the last 2 decades reflects the culture of the firm and strong focus on quality parameters.
- This positions them to be a preferred supplier for their partners

### Key Triggers

- Sputnik Vaccine orders
- Large Cash pile to be used for possible M&As
- Large Injectibles market in China – yet to be explored
